YEAR 2 I can skills and knowledge statements to help inform scholar pack assessment

- **ALL** statements for each project and a **FLAIR and ENTHUSIASM** for the topic = working above (some statements are aimed at working above)
- **MOST to ALL** statements for each project = working at
- **SOME** statements for each project = working below

I can statements
Christmas card slider
Can I design my card using appropriate vocabulary in labels?
Can I explain my choices of appearance and character?
Can I explain what a mechanism is and how mine works?
Can I research different ideas and use these to inform my design ideas?
Can I decorate my product to match my plan?
Can I make my product move well and smoothly?
Can I make holes and draw lines for the slider with little guidance?
Can I use scissors to cut with little guidance and make smooth lines?
Can I evaluate my product saying what went well and what I would improve?
Making a secure, moving windmill
Can I identify and explain some features that would appeal to the user? (mouse)
Can I create a suitable design using captions and drawings?
Can I make a stable structure that can support the turbine?
Can I explain what makes a strong, secure structure?
Can I select and use the correct materials with some precision e.g. tape and glue?
Can I make a functioning turbine and axel that moves?
Can I evaluate my product against a design criteria and say how my product has or hasn't met it?
Can I explore existing products and say what I will include in mine?
Can I use tools and equipment e.g. scissors and joining and with competence and skill?
Can I say and show how to make my structure more stable?
Fabric bunting
Can I design my product using labels, captions, pictures and relevant vocabulary?
Can I stick to my plan or justify a change in appearance, technique or material?
Can I explain my choice of design?
Can I explain what a running stitch is?
Can I use the needle and running stitch with little guidance and modelling and rectify mistakes?
Can I make and use a template for my product?
Can I make my product appealing and eye catching and relevant for the audience?
Can I use fine motor skills to cut and stick on decorations?
Can I evaluate my product saying what went well and what to improve?
Can I peer evaluate?
Can I stick to a design criteria and explain if my product has met the criteria or not?
Can I use scissors with control and create smooth edges?
